Primero se deben completar los campos ISPF Library y el campo MEMBER con el nombre del primer miembro a comparar:

```
Menu RefList Utilities Help
                    SuperC Compare Utility - New Data Set
 Command ===>
 Specify "New" Data Set to be compared, then press the ENTER key.
   Project . . . COMPARE
   Group . . . BIBLIO
   Type . . . FUENTES
                                  (Blank or pattern for member selection list,
   Member . . . assemb
                                    "*" for all members)
 "New" Other Partitioned or Sequential Data Set:
   Data Set Name . . .
   Volume Serial . . .
                                  (If not cataloged)
 Profile DS Name . . .
 Data Set Password . .
                                  (If New data set password protected)
Enter "/" to select option
                                Execution Mode
                                                        Output Mode
   Mixed Mode
                                                        1 1. View
                                1 1. Foreground
                                   2. Batch
                                                           2. Browse
```

Luego se debe completar los campos ISPF Library y el campo MEMBER con el nombre del segundo miembro a comparar:

En el campo LISTING DD NAME se especifica el archivo secuencial en el cual se alojará el resultado de la comparación. Dicho archivo deberá tener una longitud de registro de 133 posiciones.

Oprimiendo **ENTER** comienza el proceso de comparación.

```
Menu RefList Utilities Help
                   SuperC Compare Utility - Old Data Set
 Command ===>
Specify "Old" Data Set to be compared, then press the ENTER key to compare to
 "New" Data set . . : COMPARE.BIBLIO.FUENTES(ASSEMB)
   Project . . . COMPARE
   Group . . . BIBLIO
   Type . . . FUENTES
   Member . . . assemb2
 "Old" other Partitioned or Sequential Data Set:
   Data Set Name . . .
   Volume Serial . . . (If not cataloged)
Listing DS Name . . . USUARIO.SUPERC.LIST
Data Set Password . . (If Old data set password protected)
Listing Type . . . . 1 1. Delta 2. CHNG
                                           3. Long
                                                   4. OVSUM 5. Nolist
Sequence Numbers . . 1 1. BLANK 2. SEQ
                                           3. NOSEO
```

Automáticamente el ISPF muestra en pantalla el resultado de la comparación

- A toda línea del Primer miembro comparado que no existe en el Segundo se le antepone una "l".
- A toda línea del Segundo miembro comparado que no existe en el Primero se le antepone una "D".

Como la salida de la comparación ocupa más de una pantalla se puede escrolear utilizando:

- [F8] Scroll abajo
- Scroll arriba
- Scroll derecha
- F10 Scroll izquierda

```

Menu Help

Desde el Menú de Utilitarios del ISPF:

Option ===> 14

ENTER

Utility Selection Panel Option ===> 14 1 Library Compress or print data set. Print index listing. Print, rename, delete, browse, edit or view members Allocate, rename, delete, catalog, uncatalog, or display 2 Data Set information of an entire data set Move, copy, or promote members or data sets 3 Move/Copy 4 Dslist Print or display (to process) list of data set names. Print or display VTOC information 5 Reset Reset statistics for members of ISPF library Initiate hardcopy output 6 Hardcopy 7 Download Download ISPF C/S, VA for ISPF, transfer map, or data set. 8 Outlist Display, delete, or print held job output 9 Commands Create/change an application command table This option reserved for future expansion. * Reserved Format definition for formatted data Edit/Browse 11 Format 12 SuperC Compare data sets (Standard Dialog) 13 SuperCE Compare data sets Extended (Extended Dialog) 14 Search-For Search data sets for strings of data (Standard Dialog) 15 Search-ForE Search data sets for strings of data Extended (Extended Dialog)

Primero se deben completar los campos ISPF Library y el campo MEMBER con el hombre del miembro dentro del cual se desea efectuar la búsqueda de la cadena de caracteres.

En el campo LISTING DATA SET se especifica el archivo secuencial en el cual se alojará el resultado de la búsqueda. Dicho archivo deberá tener una longitud de registro de 133 posiciones.

ENTER

Si se desea efectuar la búsqueda en más de un miembro de la biblioteca, no se deberá completar el campo MEMBER. El ISPF mostrará la lista de miembros de la biblioteca. Para seleccionarlos, coloque una "s" a la izquierda del miembro. Menu Help Utility Selection Panel Option ===> 14 Compress or print data set. Print index listing. Print, Library rename, delete, browse, edit or view members Data Set Allocate, rename, delete, catalog, uncatalog, or display information of an entire data set Move/Copv Move, copy, or promote members or data sets Dslist Print or display (to process) list of data set names. Print or display VTOC information Reset. Reset statistics for members of ISPF library Hardcopy Initiate hardcopy output Download Download ISPF C/S, VA for ISPF, transfer map, or data set. Display, delete, or print held job output Outlist Create/change an application command table Commands Reserved This option reserved for future expansion. 11 Format Format definition for formatted data Edit/Browse 12 SuperC Compare data sets (Standard Dialog) 13 SuperCE Compare data sets Extended (Extended Dialog) 14 Search-For Search data sets for strings of data (Standard Dialog) 15 Search-ForE Search data sets for strings of data Extended (Extended Dialog)

El ISPF despliega una ventana en la cual se puede ingresar hasta 10 cadenas de caracteres a ser buscadas en el miembro.

ENTER

Aparecerá una ventana indicando que la búsqueda se encuentra en proceso

Automáticamente el ISPF muestra en pantalla el resultado de la búsqueda.

Indica el o los números de línea dentro del miembro en las cuales se encontró la cadena de caracteres.

Como la salida de la búsqueda ocupa más de una pantalla se puede escrolear utilizando:

F8 Scroll abajo

PROCESO DE LOGOFF - TSO

El TSO despliega la pantalla de opciones con respecto a las acciones a tomar con el archivo de log del usuario.

- Generalmente se selecciona la opción 2.
- También se especifica la clase de JES2 destinada a imprimir el archivo de log del usuario en caso de requerirse esta operación.
- Para finalizar la sesión TSO seleccionar alguna de las 4 opciones de proceso del archivo del log y oprimir:

```
Specify Disposition of Log Data Set
Log Data Set Disposition
   Process option . . . 2
                           1. Print data set and delete
                            2. Delete data set without printing
                            3. Keep data set - Same
                                (allocate same data set in next session)
                            4. Keep data set - New
                                (allocate new data set in next session)
